About Zakion Energy

Powering Homes. Empowering Businesses.
Building a **Sustainable Future.**

We are a team of social entrepreneurs and engineering professionals dedicated to enrich lifestyle experience and contribute infrastructure through renewable energy and sustainable concepts.

zakionenergy

Our Vision

Make footprints in global march towards energy sustainability.

Our Mission

Since the inception of Zakion in 2015, our instinct is to contribute to the global sustainability initiative and enable access to affordable energy to people in every corner of the world.. Our strength lies in the pool of experts and core industrial knowledge, with which we aim to become a pioneer in energy engineering.

From Innovation to Renewable Energy

Our Story

2015
The Beginning

Founded in 2015, with successfully delivered home automation system projects.

2017
Expanding into Energy

Expanded into ELV and Solar Energy, broadening Zakion's expertise into energy-related solutions

2020
Zakion Energy

Started Zakion Energy, marking the beginning of a dedicated focus on the energy sector.

Present Stage

2026
Growing with Renewable Energy

Today, Zakion Energy is actively operating and growing in the renewable energy sector, continuing its journey towards delivering sustainable energy solutions.

Why Choose Zakion?

Certified Engineers

Experienced professionals ensuring safe and high-quality installations.

Premium Components

Trusted brands and certified equipments for reliable performance.

Subsidy Assistance

Complete guidance for subsidy eligibility and documentation.

Complete EPC Solutions

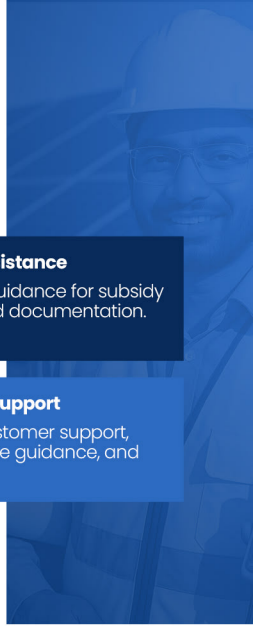

Consultation, design, procurement,installation, and support..

Fast Installation

Efficient project execution with timely completion and quality.

Dedicated Support

Ongoing customer support, maintenance guidance, and service.

Why Renewable Energy?

- Save on **Electricity Bills**
- One-Time Investment **for 25 Years**
- **Reduce** Carbon Footprint
- **Reduce** GlobalWarming
- Eco-Friendly & **Sustainable Living**
- Limitless & **Everlasting Energy**

ON GRID SYSTEM

In On Grid System, the electricity generated by solar is used by the property. If a grid connected system is producing more power than the consumption, the surplus is fed on to the grid.

Reduce Electricity Bills

Generate your own clean energy and lower your monthly electricity costs.

Net Metering Benefits

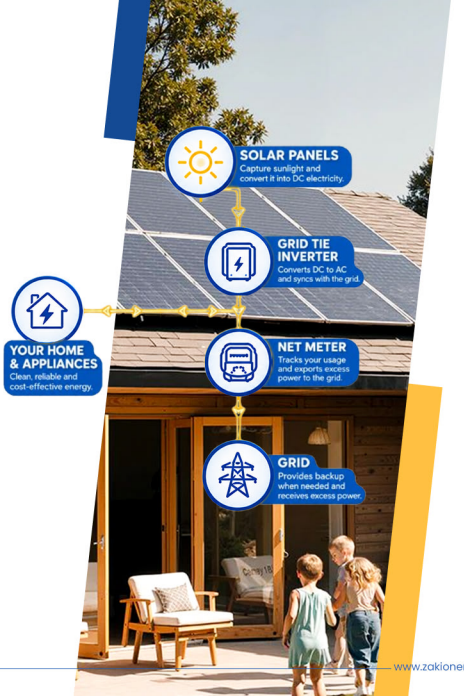

Earn credits for surplus power sent to the grid through net metering.

Zero Fuel Cost

Solar energy is free and abundant – power your home or business at zero fuel cost.

Eco-Friendly Solution

Reduce carbon footprint and contribute to a greener, sustainable future.

HYBRID SYSTEM

In Hybrid system, both grid and battery is involved. Systems that are already connected to the electricity grid can start taking advantage of battery storage as well..

Uninterrupted Power

Battery backup ensures power during outages and load shedding.

Maximize Solar Usage

Store excess solar energy and use it whenever you need.

Smarter Savings

Reduce reliance on the grid and lower electricity bills

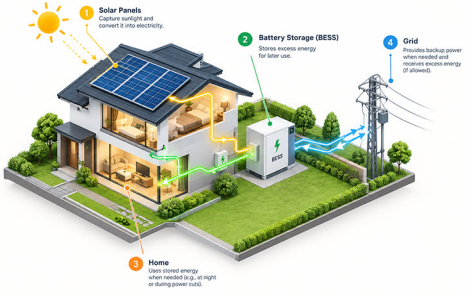

Energy Independence

Greater control, reliability and peace of mind for your home.

Battery Energy Storage System (BESS)

BESS stores excess solar energy or electricity from the grid and makes it available later—during the night, power cuts, or peak-demand periods. It helps you maximize solar usage, reduce grid dependence, and keep your home powered when you need it most.

Backup Power

Keeps essential appliances running during power cuts.

Store Solar Energy

Save excess solar power generated during the day for later use.

Reduce Electricity Bills

Use stored energy during high-tariff periods and reduce grid consumption..

Energy Independence

Less dependence on the grid with reliable, on-demand power for your home & Business.

AMC Services

Solar Panel Cleaning

- Better Absorption
- Improved Output
- Panel Care

System Performance Monitoring

- Real-Time Tracking
- Early Fault Detection
- Reliable Operation

Detailed inspection Report

- System Health Check
- Fault Identification
- Maintenance Planning

Efficiency & Degradation Tracking

- Efficiency Analysis
- Performance Tracking
- Long-Term Reliability

Subscription Plans

Monthly Plan

Quarterly Plan

Half-Yearly Plan

Yearly Plan

Solar Home

Discover personalized On Grid solar solutions
designed for your beautiful home's energy needs and budget.

3 KW

- Save up to **₹ 6,000** on Bi-monthly Electricity Bills
- Produce an Average of **12 Units** Daily
- Need Only **300 Sq.ft** of Shade-Free Area

5 KW

- Save up to **₹ 10,000** on Bi-monthly Electricity Bills
- Produce an Average of **20 Units** Daily
- Need Only **500 Sq.ft** of Shade-Free Area

What can your solar system power?

	Air conditioner	Refrigerator	Washing machine	TV	Fan	LED bulb	Tube light
3 KW	1	1	1	1	4 - 5	5 - 6	2 - 3
5 KW	2	1	1	1	5 - 6	6 - 7	3 - 4

- Reduce Electricity Bills
- Eco-Friendly Energy
- Reliable & Long Lasting
- Low Maintenance

zakionenergy

www.zakionenergy.com

Smart Components. Reliable Energy.

Lithium Battery

- High Energy Density
- Advanced Safety
- Reliable Backup Power
- Zero Maintenance
- High Durability & Lifecycle

TOPCon BiFacial Solar Panel

- Higher Energy Yield
- Better Performance in Low Light
- Strong Durability
- Lower LID
- G12R Cell Packing

Micro Inverter

- Panel-Level Optimization
- Reduce power loss
- High Conversion Efficiency
- Independent MPPT
- High Shade Tolerance

SOLAR AESTHETICS

Where energy savings meet **timeless beauty**

Power Roof

Seamless solar integration for your home

Power EV Port

Solar-powered parking with EV charging

Power Gazebo

Turn outdoor spaces into energy-generating spaces

Power Canopy

Smart shade that generates clean energy

Return on Investment

Before Solar

- Higher grid reliance
- Higher electricity bills
- Subject to rate hikes

After Solar

- Direct solar generation
- Lower grid consumption
- Reduced power bills

Illustrative Concept

Generating your own power directly offsets energy purchased from the utility, minimizing monthly grid outlays.

Note: Actual savings vary with system size, local solar irradiance, tariff structure and household consumption patterns.

Easy EMI Plans

Get solar power with easy monthly installments, ranging from 6 to 60 months.

Greater ROI

Earn more with your solar investment, with returns ranging from 22% to 30% for On-Grid Solar systems.

Government Subsidy

Save big with a ₹78,000 subsidy for residential solar plants of 3KW and above.

Tax Benefits

Enjoy tax savings with income tax depreciation benefits for your solar Plant.

Our Work Process

From First Assessment to Long-Term Performance in **8 Steps**

01 Site Auditing

02 Consulting

03 Designing & Architecting

what our clients say

Real Feedback from
Our Happy Customers

Rahees
Managing Director
Wins Autos, Calicut

Electricity costs were a major recurring expense that affected our monthly margins. We needed a reliable and sustainable power solution to reduce these costs effectively. Choosing **Zakion Energy** was the best decision we made. Their team handled everything seamlessly-from evaluating our energy needs to smooth installation and completing all the necessary paperwork without any hassle.

Mohammed Yousuf
Admin Officer
Markazul Uloom English School, Kondotty

Managing electricity costs was once a major struggle for our institution. By adopting Zakion Energy's solar system, our bill dropped by around 90%. From timely installation to handling all KSEB paperwork, Zakion Energy delivered outstanding service andtrue energy freedom.
